

Women's Surgery Center Increases Efficiency by 50% with Trivalence

Dallas-based ASC saves thousands of dollars per year with purpose-built procurement and payment software

Part of the Texas Health Presbyterian Hospital Dallas health system, Texas Health Women's Specialty Surgery Center (THWSSC) is a state-of-the-art women's surgical facility providing surgical services including urology, gynecological, breast, and reconstructive surgery. Struggling to manage multiple procurement and payment platforms, THWSSC turned to Trivalence to help unify processes to uncover time and value.

The problem

A leading women's surgical facility in the Dallas area, THWSSC faced common challenges in their procurement processes. Disconnected tools across finance, supply chain, and AP meant that staff was spending up to five hours a day on procurement alone, with an additional 15.5 hours per week processing invoices.

Aside from juggling log-in information and managing multiple platforms, the fragmented procurement, payment and AP process led to duplicate payments, delays, and reconciliation issues.

THWSSC knew it needed to find a better, more unified solution that would free more staff time, reduce complexity, and uncover opportunities for savings.

The solution

Trivalence worked with THWSSC and its third-party AP team to unify its procurement, inventory, AP, and payments processes.

Trivalence's Single Sign-On enables users to log in once with their organizational credentials, diminishing stress and security risks involved with keeping track of multiple passwords.

Automated workflows and AP, and intelligent 3-way match not only decrease the time staff spend on procurement and payment tasks, but also reduces errors and duplication. Trivalence's embedded item master provides the organization with stronger inventory tracking and control, while the all-in-one vendor platform has improved vendor oversight and enabled THWSSC to uncover more cost-saving opportunities.

Before Trivalence
staff was spending up to

**15.5 hours
a week**

processing invoices

Outcomes

To-date, THWSSC has seen marked improvements in both staff efficiency and the bottom line. By using Trivalence, THWSSC:

Improved
operational
efficiency by

50%

saving 17.5
hours per week
processing POs

Reduced
invoicing time by

45%

saving 1.72
minutes
per invoice
processed

Saved

\$5,000

annually due to
improved staff
efficiency

Generated

\$4,000

of annual value
by using a clean
item master for
data integrity

Uncovered

\$19,800

in annual value
with Trivalence's
3-way match

"Trivalence is one of the easiest systems I've ever used," said *Nancy Calero, Accounts Payable Specialist*. "It keeps up with discrepancies, and if there is an issue, it is really easy to help find and solve. We save a lot of time with the 3-way matching, and it minimizes the amount of paper we use."

About Trivalence

Most non-acute healthcare providers lack visibility into how they buy and pay for supplies, and it's costing them hundreds of thousands of dollars per year. Trivalence takes a different approach, combining procurement, inventory and payables into a modern, AI-enabled solution that gives non-acute providers unprecedented clarity and control to drive savings. With Trivalence, procurement and finance teams can order, track and pay for non-labor expenses in one place, reducing workload by up to 50% at a 10x ROI.
