

# Three Gables Surgery Center Saves Time and Streamlines Operations

**Three Gables Surgery Center** provides patients in the Tri-State area with a wide range of multi-specialty surgical services, including orthopedic, ENT, and pain management. Previously, the organization used antiquated, manual processes to manage supply chain and accounts payable (AP) workflows. Trivalence has helped them unify and automate to save time and improve the bottom line.

## The problem

Using clunky, manual processes and paper-based workflows, Three Gables was faced with multiple roadblocks to supply chain success. Inefficient processes were time-consuming and led to errors like payment duplication and reconciliation issues. With limited visibility into spend, inventory or vendor performance, Three Gables struggled to achieve financial stability.

The organization sought an innovative partner that could improve supply chain operations without increasing staff burdens with complicated implementations.

## The solution

Trivalence's all-in-one procurement, inventory, AP, and payment platform creates a single, automated system that enables Three Gables to easily manage all aspects of the supply chain process.

Previously, staff had to chase down invoice discrepancies and errors that were causing bottlenecks in the payment process. With Trivalence's robust 3-way-match, staff can more easily identify errors and correct them within seconds. Because the platform creates a unified view of all procurement, inventory, and payment processes, Three Gables has more clarity into its ordering trends and vendor relationships to more easily uncover savings opportunities to boost margins.

The Three Gables staff has particularly enjoyed Trivalence's automated PO processes which eliminate the need for them to create individual POs for each vendor.

"I feel like the Trivalence team is right there to answer any questions as soon as I reach out, which gives me great peace of mind. The support is truly fantastic!"

- Tara Barron, Materials Manager at Three Gables

## Outcomes

By removing manual tasks from the procurement process and implementing a robust item master and 3-way-match, Three Gables:

Has **saved 15 hours per week** on procurement and payment workflows

**Can resolve match discrepancies with a single click**, removing roadblocks to payment and saving 30 minutes a day by eliminating research and calls to suppliers to identify invoicing issues.

**Speeds the ordering process** by adding supplies from the pre-loaded item master to order from multiple places at once and automatically generate POs.

## About Trivalence

Most non-acute healthcare providers lack visibility into how they buy and pay for supplies, and it's costing them hundreds of thousands of dollars per year. Trivalence takes a different approach, combining procurement, inventory and payables into a modern, AI-enabled solution that gives non-acute providers unprecedented clarity and control to drive savings. With Trivalence, procurement and finance teams can order, track and pay for non-labor expenses in one place, reducing workload by up to 50% at a 10x ROI.
